B. Tech in Computer Science & Engineering | 2021-2025

Model Institute of Engineering and Technology, Jammu

- CGPA: 8.25 (Till 7th Semester)

Second Year High School Student

Indira Public Higher Secondary School, Jammu

- Percentage: 80%

INTERNSHIP EXPERIENCE

Frontend Developer | Oct 2024 - Dec 2024

UPNyX Innovative Solutions

- Reduced webpage loading time by implementing lazy loading.
- Integrated WebSocket connections for real-time data communication.
- Contributed to deployment processes, streamlining the final stages of project delivery.

Full Stack Developer | Feb 2024 - Oct 2024

Centre for Research Innovation & Entrepreneurship, MIET Jammu

- Architected and developed both user and admin dashboards.
- Utilized Supabase for serverless backend and MySQL database.
- Contributed to deployment processes, streamlining the final stages of project delivery.

PROJECTS

HoneyGuard

Hackathon Project

- Built full-stack HoneyGuard platform using Node.js, React.js, and Supabase for dynamic honeytoken generation and real-time threat detection.
- Developed cybersecurity modules for phishing traps, fake credentials, malware files, and integrated document tracking.

People.ai

Minor/Major Project, 7th - 8th Semester

- Engineered and deployed a comprehensive system for evaluating and rating potential faculty members, incorporating advanced qualitative analysis techniques.
- Improved recruitment efficiency by using automated fitment score calculation and streamlined candidate selection, significantly improving the quality of hires and reducing the time-to-hire.
